PROFESSIONAL SUMMARY

A MERN Stack Developer with hands-on experience building community-driven platforms (Animemaps.com) and rigorous training from Generation Thailand. Combines strong JavaScript, React, and Tailwind CSS skills with 4 years of cross-cultural experience in Japan. Trilingual and self-directed, looking to bring a global perspective and robust technical foundation to an innovative software development team.

SKILLS

Frontend: React.js, TypeScript, Tailwind CSS, HTML, CSS

Backend : Node.js, Express.js, MongoDB, PostgreSQL

Tools & DevOps: Git, GitHub, Figma, Agile/Scrum

Soft Skills: Cross-cultural Communication, Leadership (Scrum Master), Growth Mindset, Teamwork, Product Ownership

Languages: Thai (Native) · English (TOEIC 875) · Japanese (JLPT N3, targeting N2 — Jul 2026)

PROJECTS

Scrum Master & Fullstack Developer | [Creative Market](#) | Group Project 2026

- Led agile team operations as Scrum Master, facilitating daily stand-ups, sprint planning, and sprint retrospectives to foster continuous improvement and maintain project alignment.
- Architected the initial system design and API blueprints before code execution, ensuring scalable database relationships and clean integration between frontend and backend.
- Developed core user-facing modules, including the dynamic Product Market page with comprehensive search filters, and an optimized Landing Page to drive user engagement.
- Built an e-commerce platform dedicated to human-created (non-AI) artworks, empowering artists to showcase and monetize their creations.
- Tech Stack: **React.js, Tailwind CSS, MongoDB, Node.js, Express.js** | Deployed via: Vercel, Render

Solo Developer | [Animemaps Thailand](#) | Personal Project 2026

- Designed and built a frontend web aggregator for anime events in Thailand, serving users who want to efficiently discover and filter events by date and category.
- Implemented a real-time search popup with live filtering, a hero slideshow, an event calendar with multi-category filters, and a fully mobile-responsive layout.
- Organized codebase into modular CSS and JS files per feature for long-term maintainability, selectively integrating Tailwind CSS.
- Currently migrating the architecture to a Full-Stack ecosystem (React.js, Node.js, Express, and SQL) to support dynamic event data and enhanced scalability.
- Tech Stack: HTML, CSS, Vanilla JavaScript, CSS ([Transitioning to React & Node.js](#)) | Deployed via: Vercel

EXPERIENCE

Full-Stack Software Development Bootcamp | [Generation Thailand](#) | Bangkok, Thailand Mar – Jun 2026

- Built and deployed full-stack web applications collaboratively in a team-based, Agile environment.
- Applied MERN Stack (MongoDB, Express.js, React.js, Node.js) in real-world project scenarios under industry-simulated conditions.

Co-Founder & Product Owner | [Animemaps.com](#) | Remote 2023 – Present

- Co-founded and launched a platform serving the global anime community, managing product direction, user requirements, and feature prioritization.

- Cultivated an active global user base by strategically managing presence across 5 major platforms (Facebook, X, Reddit, Instagram, Threads), including building and moderating our own dedicated Reddit community.
- Leveraging Full-Stack bootcamp training to plan and execute the technical roadmap for future platform iterations.
- Demonstrated entrepreneurial leadership by taking a passion project from concept to a live product.

Tokyo Internship — Market Research Analyst | [Edith Grove \(Tokyo Government Program\)](#) | Tokyo, Japan *Oct – Dec 2025*

- Conducted market research supporting Thailand business expansion strategy for Japanese clients.
- Utilized trilingual skills (Thai, English, Japanese) in a professional Tokyo business environment, strengthening cross-cultural communication and stakeholder coordination abilities.

EDUCATION

College of International Management | Strategic Management and Leadership | [Ritsumeikan Asia Pacific University \(APU\)](#) | Beppu, Japan *Sep 2020 – Sep 2024*

- Collaborated in a highly multicultural environment (90+ nationalities) conducting coursework in English and Japanese.
- Capstone Project — Web3 & NFT Business Strategy for host company.
- Selected Imagica Group (listed company) as the client and proposed a Web3/NFT-integrated business strategy to enhance company performance of the host company by 2025.
- Designed an NFT-based PR and IP monetization model leveraging Imagica's existing intellectual property assets to drive new revenue streams and audience engagement.
- Delivered a full business plan covering market feasibility analysis, financial projections, scalability assessment, and alignment with global and local trends — presented in a competitive, multicultural academic setting.
